Reasons for Allowance

1. The Examiner has previously rejected claims 31, 32, 36, 42-52, 55-57 under Ishiguro, US patent 5883958 as the closest rejection in view of the prior art. Specifically Ishiguro (Figure 7), discloses a media key block which has a single column index field, a public key, and an encrypted encryption key.

Ishiguro however fails to disclose the recitation “wherein the column index record comprises two or more column fields” which was present in the previously objected claims 34, 35, 53, 54, 39.

The search of the prior art has not uncovered this recitation, and applicant has amended the independent claims to recite this limitation. Accordingly the rejection is withdrawn and the previously rejected claims are allowable.
